

GOWRISHANKAR S

Coimbatore, TN | +91 96773 20354 | [Mail](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI Developer skilled in Computer Vision, Deep Learning, and Generative AI, with hands-on experience building production-ready, real-time AI systems using Python, PyTorch, and LLM frameworks such as LangChain and LangGraph. Proven track record delivering automated detection and inspection solutions for industrial applications.

TECHNICAL SKILLS

Generative AI & LLMs: GPT Models, LangChain, LangGraph, RAG Architectures, Prompt Engineering, Vector Databases MCP Protocols, Transformers, NLP

Traditional ML & Deep Learning: Classification, Clustering, Regression Analysis, Decision Trees, Neural Networks, PyTorch, TensorFlow, Scikit-learn, Predictive Modelling, Computer Vision (YOLOv8, OpenCV)

Engineering & Cloud: Python, SQL, ETL Design Patterns, FastAPI, Flask, Docker, CI/CD Pipelines, Git/GitHub, Streamlit, Linux, RESTful APIs, Node.js

Data Analytics & Visualization: Data Analytics, Exploratory Data Analysis (EDA), Statistical Analysis, Data Preprocessing & Transformation, Pandas, NumPy, Power BI, Data Visualization, Dashboarding, Google Sheets API

Hardware & Mobile: Raspberry Pi, IoT Sensor Integration, Android, AR, Edge Computing, CUDA

PROFESSIONAL EXPERIENCE

Forge Innovation and Ventures

July 2025 – Present, Coimbatore, Tamil Nadu

Forge Fellow

- Contributed to startup product development by transforming ideas into functional solutions through product design, validation, iterative development, and user-centric problem solving.
- Applied edge computing concepts to design efficient, low-latency solutions for distributed applications and real-world intelligent systems.
- Developed and organized knowledge bases and knowledge graphs to enable structured information management, semantic relationships, and AI-driven knowledge retrieval.
- Designed and created technical courses and learning resources, translating complex engineering concepts into structured educational content for learners and development teams.
- Researched, evaluated, and integrated emerging AI, edge computing, and product engineering technologies to accelerate innovation and improve solution development.

EDUCATION

B.Tech, Artificial Intelligence & Data Science

2022 - 2025 CGPA: 7.5

Kumaraguru College Technology

Diploma in Computer Science Engineering

Sri Ramakrishna Polytechnic College

2019 - 2022 77%

KEY PROJECTS

Visual Inspection System for Manufacturing

Computer Vision · Complete

- Led design and development of the CV pipeline, building algorithms to detect object dimensions and validate components against digital blueprints.
- Owned the hardware-software integration, engineering the plug-and-play conveyor device for real-time defect detection on the line.
- Drove automation of the validation workflow end-to-end, directly reducing manual inspection errors and increasing throughput.

Object Navigation System for Visually Impaired

Edge AI + Computer Vision · Complete

- Optimized and deployed YOLO architectures on Raspberry Pi 4 using quantization, owning edge-inference performance end-to-end.
- Designed and built the multi-modal (Audio + Haptic) feedback system from the ground up for spatial awareness.
- Architected the fail-safe navigation logic, prioritizing obstacle avoidance in dynamic indoor environments.
