PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst with a strong foundation in AI and Machine Learning. Expert in leveraging SQL and Python to extract, clean, and transform complex datasets into actionable business insights. Proven track record in building data models and interactive dashboards to support decision-making in real-time industrial environments. Passionate about optimizing data pipelines and ensuring data accuracy across enterprise-level infrastructures.

TECHNICAL SKILLS

- Data Analysis & Modeling:** SQL, Data Visualization, Data Modeling, Relational Databases, Statistical Analysis.
- BI Tools:** Power BI (Expert), Data Visualization Dashboards, Looker, Tableau.
- Programming & Scripting:** Python (Pandas, NumPy, Scikit-learn), SQL, Node.js, Flask, FastAPI.
- Data Engineering:** ETL Processes, Data Pipelines, Google Sheets API, Docker, Linux, API Integration.
- Machine Learning & AI:** Computer Vision (YOLOv8, OpenCV), PyTorch, TensorFlow, Transformers.

PROFESSIONAL EXPERIENCE

Forge Innovation and Ventures

Coimbatore, Tamil Nadu

Forge Fellow (Innovation Engineer)

July 2025 – Present

- Architecting AI/ML models designed for low-latency, real-time data environments, utilizing SQL for backend data management and model performance tracking.
- Leading end-to-end technology-driven product development, managing the lifecycle from data acquisition and cleaning to final cloud deployment.
- Implementing robust MLOps and data versioning practices including containerization with Docker and CI/CD pipelines to ensure data integrity.

KEY PROJECTS

Visual Inspection System for Manufacturing

- Developed a conveyor device utilizing 2D file comparison to automate quality assurance, reducing manual inspection errors and increasing production throughput.
- Engineered vision algorithms to validate physical components against digital blueprints, ensuring 100% data accuracy in manufacturing lines.
- Designed a hardware-software interface for real-time defect identification and automated reporting/dashboards.

AI-Powered Electronic Component Detector

- Built an end-to-end system using Transformers and PyTorch to classify electronic components in high-density PCB images.
- Implemented a Flask-based interface supporting batch uploads and confidence-based filtering to streamline repair workflows and data analysis.

EDUCATION

BTech in Artificial Intelligence and Data Science

May 2025

Kumaraguru College of Technology, Coimbatore

Diploma in Computer Science Engineering

June 2022

Sri Ramakrishna Polytechnic College, Coimbatore
